PROFESSIONAL SUMMARY

BSIT Graduate specializing in Web and Mobile Application Development with practical project experience in PHP, React, and MySQL, complemented by self-directed study in modern full-stack JavaScript (Next.js, Node.js, MongoDB Atlas). Backed by an 800-hour technical support internship handling enterprise network configuration, system troubleshooting, and Active Directory administration. Detail-oriented problem solver seeking an entry-level position in software engineering or IT operations to apply programming fundamentals and systems support skills.

EXPERIENCE

CK Football Shirts | Operations Coordinator (Part -Time)

April 2026 - Present

- Processed monthly intake batches of 100+ jerseys, auditing kit seasons, product specifications, and condition flaws in Google Sheets databases.
- Organized and uploaded product photo assets (main, detail, and flaw images) to maintain listing consistency across active shop inventory.

Altius Inspiro Inc. | Technical Support Specialist (Internship 800 Hours)

January 2026 – May 2026

- Reconfigured switch port VLAN assignments using PuTTY to restore network connectivity and provide failover access during primary VLAN disruptions.
- Joined workstations to the corporate domain, configured DHCP network settings, and organized computers into designated Active Directory Organizational Units (OUs) to enforce department policies.
- Installed necessary software tools, operational utilities, and endpoint security agents across newly provisioned workstations.
- Resolved hardware faults and campaign application errors via internal ticketing systems, while tracking IT hardware inventory and equipment deployments.

PROJECTS

CK Football Shirts E-Commerce Web Application

Full-Stack Developer | September 2026 | <https://ckfs-shop.vercel.app/>

Stack: Next.js, Node.js, TypeScript, MongoDB, Tailwind CSS, PayMongo API

- Built and deployed a responsive e-commerce web prototype on Vercel to practice full-stack development and modern JavaScript frameworks outside of university coursework.
- Connected a cloud MongoDB database to store product catalog data, kit details, and image links, displaying items dynamically on the frontend.
- Implemented dynamic search, category filtering, and an interactive shopping cart that tracks selected items, quantities, and price totals.
- Integrated the PayMongo API in test/sandbox mode to simulate customer checkout and payment screens for GCash, Maya, and cards.

NUExtend: A system for Project Management at NU Baliwag Community Extension Office (Capstone)

Project Manager & Lead Researcher | October 2025

Stack: Systems Analysis, Requirements Engineering, Process Flow Mapping, Agile Sprints, Technical Documentation

- Interfaced directly with the Community Extension (ComEX) Office Head to audit manual operational workflows, translating administrative requirements into functional flowcharts, use cases, and technical acceptance criteria.
- Mapped end-to-end user journeys and compliance documentation for volunteer tracking, QR check-ins, and automated certificate generation.
- Authored core research documentation and coordinated team sprint deliverables, ensuring feature implementations strictly aligned with client requirements and defense criteria.

Joy Pascual Dental Clinic Booking System (School Project)

Full-Stack Developer | October 2024

Stack: PHP, MySQL, JavaScript, HTML/CSS

- Developed a web-based appointment management system to streamline patient scheduling, improve accessibility, and enhance clinic operations.
- Designed an intuitive interface for patients and staff, featuring online appointment creation, schedule tracking, automated email confirmations, and digital receipts.

EDUCATION

National University – Baliwag

Bachelor of Science in Information Technology with Specialization in Mobile and Web Application (BSIT-MWA)

- Dean's Lister – AY 2022–2023 (3 Terms) and AY 2023–2024 (1 Term)

SKILLS AND CERTIFICATIONS

- Development:** TypeScript, JavaScript (ES6+), Next.js, React.js, React Native, Node.js, Express, PHP, Java, HTML5, CSS3, Tailwind CSS
- Databases & Tools:** MongoDB (Atlas), MySQL, Firebase Firestore, Vercel, Git/GitHub, Postman, VS Code, Agile Sprints
- Networking & Systems:** Active Directory (OUs & GPO), VLAN Configuration (PuTTY), DHCP, Network Troubleshooting
- AI & Productivity:** Prompt Engineering (ChatGPT, Gemini), Google Workspace, Microsoft Office Suite
- Certification:** EF SET English Certificate 58/100 (B2 Upper Intermediate) – March 2026
