## PROFESSIONAL SUMMARY

---

An Information Technology student specializing in Web and Mobile Application Development with practical experience in full-stack engineering using PHP, React, and MySQL. Currently expanding skill sets into the MERN stack while leveraging Agile workflows, AI-assisted tools, and an 800-hour technical internship background in system troubleshooting. Adaptable and committed to continuous learning, seeking to contribute as a Junior Full-Stack Developer.

## EXPERIENCE

---

**CK Football Shirts** | Operations Coordinator (Part -Time) *April 2026 - Present*

- Organized product uploads and tracked inventory using Google Sheets, reducing stock errors and keeping daily business operations running smoothly.

**Altius Inspiro Inc.** | Technical Support Specialist (Internship 800 Hours) *January 2026 – May 2026*

- Set up and managed local networks (VLANs) using PuTTY, improving data flow and overall network security.
- Controlled user accounts and access permissions through Active Directory and Group Policy, protecting sensitive company data from unauthorized access.
- Fixed hardware and software problems for internal employees, reducing tech delays and helping staff work more efficiently

## PROJECTS

---

**NUExtend: A system for Project Management at NU Baliwag Community Extension Office (Capstone)**

*Project Manager | System Architect | Researcher | October 2025*

- Conducted client discovery interviews and stakeholder analysis to translate institutional needs into technical requirements and system features.
- Conceptualized and specified core platform capabilities, including QR-based attendance tracking, automated certificate generation, and digital document processing.
- Designed end-to-end system flows, user journeys, and functional logic connecting the web (React), mobile (React Native), and API (Laravel) platforms.
- Coordinated sprint milestones and cross-functional deliverables, ensuring feature execution strictly aligned with client specifications and documentation.

**Joy Pascual Dental Clinic Booking System (School Project)**

*Full-Stack Developer / System Architect / Researcher / October 2024*

- Developed a web-based appointment management system to streamline patient scheduling, improve accessibility, and enhance clinic operations.
- Designed an intuitive interface for patients and staff, featuring online appointment creation, tracking, and a 3D dental model for treatment visualization, with automated email confirmations and digital receipts.
- Built the system using PHP, HTML, CSS, and MySQL for secure data management and reliable performance.

## EDUCATION

---

**National University – Baliwag**

Bachelor of Science in Information Technology with Specialization in Mobile and Web Application (BSIT-MWA)

- Dean's Lister – AY 2022–2023 (3 Terms) and AY 2023–2024 (1 Term)**

## SKILLS AND CERTIFICATIONS

---

- Development:** HTML, CSS, JavaScript, React.js, PHP, Java, Node.js, Express
- Databases & Tools:** MySQL, MongoDB, Firebase Firestore, Git/GitHub, VS Code, Agile Methodology.
- Networking & Systems:** Active Directory, Group Policy (GPO), DHCP, VLAN Configuration, Putty, Network Troubleshooting.
- AI & Productivity:** Prompt Engineering (ChatGPT, Gemini); **Microsoft Office Suite;** Google Workspace; Canva; Zoom.

- **Certification: EF SET English Certificate 58/100 (B2 Upper Intermediate) – March 2026**
